

If an individual completes all three tiers of the NILD Professionally Certified Educational Therapist (PCET) process and obtains NILD certification, ACSI will allow that certification to replace up to 9 semester hours toward the educational studies requirement of the Specialist certificate. The candidate would then only need to complete, or submit proof of completion of, 15 semester hours in a related specialized area to fulfill the educational studies requirement for the Standard Level Specialist certificate in addition to the other certification requirements. A Temporary Level certificate, which is renewable, will be issued until the applicant completes all the certification requirements for the Standard Level.

Those who hold a current ACSI certificate at the Standard or Professional Level may use any training, conference, or workshop completed for the renewal of the NILD PCET certificate toward the educational studies renewal requirement. The standard conversion rate (6 clock hours = 1 CEU) will apply.
